

The International Conference on Biofabrication (ISBF 2024)

Exhibitor & Sponsorship Prospectus

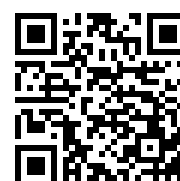

The International Conference on Biofabrication

Biofabrication 2024 Fukuoka, Japan

November 10-13, 2024

<https://www.biofabrication2024.org>

Greetings

I would like to extend a warm welcome to all of you as we gather for the International Conference on Biofabrication in Fukuoka in 2024. As the honored chair of this remarkable conference, it is my privilege to address you.

The International Biofabrication Conference was established in 2010 and has been held regularly, with the 2022 conference was held in Pisa, Italy and the 2023 conference was held in Saskatoon, Canada.

Biofabrication is an emerging field that has the potential to revolutionize our world through advances in science and technology. By harnessing biological materials and processes, we can create sustainable and innovative solutions. The purpose of this conference is to provide a platform to share leadership in the field, foster collaboration, and exchange innovative ideas and achievements.

We, as the organizing committee, planning sponsorships in the hope that participants will engage in lively discussions, and that we will actively provide opportunities for information exchange and interaction with companies. We would appreciate your understanding of the purpose of this meeting and your support for various sponsorship opportunities.

Sincerely Yours,

Koichi Nakayama, MD, Ph.D.

Chair, International Conference on Biofabrication 2024 (ISBF2024)

Director/Professor, Center for Regenerative Medicine Research,

Saga University School of Medicine

Location

Fukuoka is a city of contrasts that offers a cosmopolitan urban environment and beautiful natural scenery, a place where history and traditional culture entwine with contemporary society and global aspirations. The city is compact and easy to explore, with beaches and mountains easily accessible from the department stores of downtown Fukuoka and the shrines and temples of Hakata Old Town.

The Kyushu Grand Sumo Tournament is held every fall in Fukuoka. The Kyushu tournament began in 1957, upgraded to a formal tournament from what had been an exhibition tour. Since 1981, it has been held in Fukuoka Kokusai Center. Many jungyo beya (places where wrestlers sleep and practice) are set up around various parts of the city during the tournament. You may happen to come across a sumo wrestler during the conference.

Venue

The Kyushu University School of Medicine Centennial Hall is located in the south of the hospital campus, overlooking the 75th Anniversary Memorial Garden.

In 2003, the Kyushu University School of Medicine reached its 100th year since its inauguration as Kyoto Imperial University Fukuoka Medical College in 1903.

To celebrate the 100th anniversary, the School of Medicine Centennial Anniversary Memorial Project Support Club was formed by the School of Medicine alumni association and the professorate. The Kyushu University School of Medicine Centennial Hall was built and donated to the university by the Anniversary Project Support Club as the most important part of the anniversary project.

General Information

- **Title**: The International Conference on Biofabrication 2024 (ISBF 2024)
- **Period of the meeting**: November 10 (Sun.) – 13 (Wed.), 2024
- **Venue**: The Kyushu University School of Medicine Centennial Hall
The Kyushu University School of Medicine Alumni Hall
(3-1-1 Maidashi, Higashi-ku, Fukuoka 812-8582, Japan)
- **Chair**: Koichi Nakayama, MD, Ph.D.
(Director/Professor, Center for Regenerative Medicine Research,
Saga University School of Medicine)
- **Purpose and significance of the meeting**
During the 2024 conference, we will focus on a wide range of topics and themes, bringing together experts and researchers from around the world. We will explore various aspects of Biofabrication, including the latest research findings, technological advances, and industrial applications. In addition, through workshops and discussion sessions, we aim to facilitate interaction among participants and explore opportunities for collaborative research and partnerships.
